## **DETAILED ACTION**

### ***Drawings***

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the hook was a strain gage attached thereto must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 21 and 22 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. It appears that applicant is attempting to claim a hook with a strain gage placed on the hook itself. This embodiment is neither shown nor described.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 13-16, 20 and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by Khachaturian *et al.* (US # 5,589,646). Khachaturian *et al.* discloses the claimed invention including a shackle body (42) and a strain gage (28) indirectly attached to both the shackle body (Col. 5, lines 41-48) and indirectly attached to a hook (Col. 5, lines 36-40).

5. Claims 17-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Burns (US # 5, 783,755). See column 5, lines 20-33. The strain gages are indirectly attached to the eye bolts (66,68) through load cells (78,80).

6. Claims 21 and 22 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Reder *et al.* (US # 4,660,666). See column 3, lines 33-54.

7. Claims 21 and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by Cheng (US # 5,591,943). Cheng discloses the claimed invention including a hook (220) and a strain gage (231) indirectly attached to the hook (Col. 1, lines 36-45).

***Conclusion***

8. Claims 13-16 might be allowable if it were amended to state that the strain gage is "directly" attached to the shackle body. There seems to be no motive in the art of record to relocate the strain gages of Khachaturian *et al.* from the custom made load cell body (11) to the shackle body (42).

Claims 17-20 might be allowable if it were amended to state that the strain gage is "directly" attached to the eye bolt. There seems to be no motive in the art of record to move the strain gage of Burns from the custom made load cells (78,80) to the looped end of the of the eye bolt itself. See *In re Mills*, 916 F.2d 680, 16 USPQ2d 1430 (Fed. Cir. 1990); *In re Kotzab*, 217 F.3d 1365, 1371, 55 USPQ2d 1313, 1318 (Fed. Cir. 2000); and, *MPEP* § 2143.01.

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See *MPEP* § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

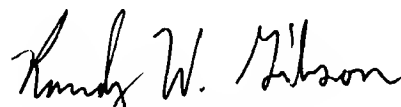

Art Unit: 2841

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
